Naor, Stephen, Joseph, Brian, and Melissa

Thank you for partnering with us this semester! I finished reading the report and wanted to express my gratitude. The Bloomfield tech staff has gained a better understanding of our internal vulnerabilities and have been reassured with our external set up. The report that was provided to us is extremely well done. I appreciate the recommendations, reference links, and the reproduction steps we have been given. This is very helpful as we don't usually have time in our day to research solutions. We are already working on addressing the immediate needs and have started working on a plan for making additional adjustments this summer.

It has been a pleasure working with everyone. I know the Bloomfield tech staff learned a lot as a result of this partnership.

Good luck with your future endeavors!

Karen
